discounts on other old & rare whiskeys from our collection

### WEDNESDAY

7pm to close

half price on all bottles and glasses of wine

### THURSDAY

7pm to close

\$3 drafts, cans & bottles of beer

# APPRECIATING — WHISKEY —

## LOOK

Before you do anything look at the whiskey, you can learn a lot from its color. Generally speaking the darker the whiskey, the older it is, because whiskey gets its color from contact with the oak barrel during aging. The type of barrel matters as well. For example a scotch whisky is being aged in a bourbon barrel that has been used several times, it's not going to pick up as much color from the barrel. If that same whisky was put in a used sherry or port cask, it will pick up some of those colors in addition to the oak barrel.

## SMELL

Realize that you can smell more from your whiskey than you will ever be able to taste. Most master distillers and blenders work primarily by nosing, not tasting. So always smell your whiskey before you taste it. Don't shove your nose into the glass or the alcohol will be too dominant. Gently raise the glass to your nose until you begin capturing the aroma. Think about what you smell. Closing your eyes can help you differentiate between aromas.

## TASTE

Make sure you coat your entire tongue and let it linger on the palate before swallowing. Does it taste the way it smells? Do the flavors evolve on the palate or stay the same? Does the whiskey feel thick or thin? What flavors do you taste? After you swallow does the flavor linger or quickly fade away? Sometimes the alcohol is too intense to fully appreciate the whiskey. Add a couple drops of water at a time to the whiskey till you find your comfort zone. Not only does the water lower the proof of the whiskey, but it can help open up the aroma's of the whiskey.

# ANGELS ENVY

Are angels truly envious of this fine whiskey? It's not just to be clever name, it actually has meaning. Known as the angel's share, this is the portion of alcohol which will evaporate from the cask during aging. It's not much that evaporates, between one and three percent depending on how hot and humid the barrel house is. But this amount of alcohol is for the angels, as the story goes. Angel's Envy derives its name from the fact that they finish aging their bourbon & rye in Ruby port barrels & Caribbean rum barrels, making the angels truly envious.

## SPIRITS

Bourbon Personal Blend	10
Bourbon Port Finish	10
Bourbon Port Finish Cask Strength	32
Rye Rum Finish	17

## COCKTAILS

### FRIENDS DON'T LIE

light & long

michter's bourbon is shaken with elderflower liqueur, aperol, lemon & peychaud's bitters and strained over crushed ice in a tall glass with a piece of lemon & grapefruit 10

### I'VE LEFT THE COUNTRY

sour & short

michter's unblended american whiskey is shaken with green chartreuse, velvet falernum & lemon and strained into a chilled coupe glass with a sage leaf 10

### COFFEE & CONTEMPLATION

boozy & alluring

michter's single barrel rye is stirred with cold brew coffee, cocchi vermouth di torino, turbinado sugar & lemon bitters and strained over a large ice cube in a short glass with a twist of lemon 10

# — WHISKEY or WHISKY? —

## Why is whiskey sometimes spelled without an “e”?

The two different spellings are just that, different spellings, like “gray” and “grey.” Scotch, Japanese & Canadian spirits are generally “whisky” and Irish & American spirits are generally “whiskey,” though they are some exceptions, i.e. Maker’s Mark.

## Who invented whiskey?

Many believe the Irish, but the Scots love to argue that point. The word whiskey/whisky comes from the Gaelic phrase “uisce beatha” or water of life. Irish whiskey was one of the earliest distilled drinks in Europe, around the 12th century. Irish Monks brought the technique of distilling perfumes back from their travels to the Mediterranean countries around 1000 A.D.

## Why is whiskey brown?

Whiskey begins as a clear grain spirit when it comes off the still. What makes it whiskey is barrel aging. Alcohol is a solvent and as the cycles of hot and cold push the whiskey into the wood, it picks up flavor and its distinct brown color from the staves of the barrel. Generally older whiskeys are darker from the longer contact with the staves.

## Is all Bourbon made in Kentucky?

Bourbon has very strict federal laws governing its production. That law does not state that it must be made in Kentucky only that it must be made in the United States. New York, Indiana, Colorado all have fantastic bourbon distilleries. Kentucky just happens to be a good place to make and where the vast majority is produced.

## What’s different about Bourbon and Tennessee whiskey?

Not much, Tennessee whiskeys are made just like Bourbon with an additional step, the Lincoln County Process. Before aging the unaged whiskey passes through a bed of hardwood charcoal, which takes off the rough edges of the spirit and adds a subtle sooty sweetness.

## Is it okay to drink my whiskey on the rocks?

Drink it however you like it, it’s yours! Purists believe adding anything to the whiskey dulls or obscures the flavor. A small amount of water, especially in high proof or barrel strength whiskeys will help bring out more aromas, some whiskeys do with ice, Experiment, it’s all about what you like.

## What does sour mash Bourbon mean?

Almost all Bourbons made today use the sour mash process, but not all of them mention it on their label. The process uses the acidic, “sour” leftovers from the previous fermentation to help properly set the pH level of the new, “sweet” mash so that fermentation is uniform and consistent.

## What is a wheated Bourbon?

Bourbon is made of grains, legally 51% or more must be corn. The rest is up to the discretion of the distiller. Typically malt is used to help with the fermentation process. Then they have to make a choice between wheat or rye. Rye makes for a spicier, bolder whiskey, while wheat is less assertive and smoother. Weller, Maker’s Mark, Old Fitzgerald are all wheated Bourbons.

## What does “finishing” or “finished” mean?

A process used mostly with Scotch whisky. The whisky is aged in used Bourbon barrels or used sherry casks. After the aging is complete, the distiller may transfer the whisky to a different cask (i.e. port, rum, tequila) for a relatively short maturation known as finishing to enhance the flavor of the whisky.

## What do some Bourbons say “sour mash”?

Some Bourbon brands make mention of this on the label, thus creating the illusion that some Bourbons are sour mash and some are not, but in fact everything regularly made today is sour mash. Sour mash refers to the addition to the freshly cooked Bourbon mash of a small portion of “setback,” or spent mash from a previous fermentation. This setback is sour, hence the name, and serves to create a beneficial environment for the yeast that will ferment the mash. Sour mash is an important step in making Bourbon, but it is not necessary and certainly not required by law.

## Who invented Bourbon?

No single individual can be credited with inventing Bourbon. It evolved in the state of Kentucky when farmers moved from the coastal states into Kentucky in the 1790s. Certain early distillers are rightfully credited with being among the first wave, though at this time there was no such thing as “Bourbon,” only corn whiskey. The Rev. Elijah Craig often gets credit not only for “inventing” Bourbon but for aging whiskey in charred oak casks. Both honors are inaccurate, as Craig was merely one of many early Kentucky settler distillers, and barrels were a common means of transporting whiskey to market.
